

SCHOOL VOLUNTEERS

The Holdenville Board Education recognizes that volunteers can make valuable contributions to students and the district educational program. Volunteers play an increasingly important part in education as they help to individualize instruction, promote school/community interaction, and enrich curriculum. Working under the direction of responsible paid employees, volunteers can perform many routine tasks that free staff members to spend time in direct contact with students, as well as providing resources to expand the educational program. The board endorses a volunteer program in the Holdenville schools, directed by the administration. Any volunteer program will be subject to appropriate rules, safeguards, and regulations as recommended by the superintendent.
